Introduction

A full-stack developer with one year of experience in HTML, CSS, javascript, Angular, typescript, and node.
Detail-oriented web developer looking to bring my skills to a tech company.

Experience

Willems Berry Farm / Abbotsford, BC.

Launched in June 2022 - [link](#)

- My role was to redesign and develop their existing website.
- As my clients use a CMS to upload and edit their websites, I built a WordPress site for them.
- I added a gallery page that is integrated with their instagram feeds.
- I added a contact form so that my clients can receive emails from customers through the contact page.

Green Around The World - Full-stack web app

Created in 2022 - [link](#)

- Designed the logo and the website for the brand-identity.
- Responsible for the client-side and server-side development.
- I created endpoints and implemented CRUD with angular, node.js and mySql database. (5 stored procedures and 5 apis are created.)
- Admin can log in to the admin portal through the login page and edit products, add new products and delete them.

The Cakery

Created in 2022 - [link](#)

- Designed a logo and website that reflect the characteristics of Cakery.
- My aim was to create a design that is playful, has a cheeky twist, but maintains a professional feel.
- Incorporated css animation as well as javascript in order to add playful functionality into the website.

Education

September 2021 - August 2021, Vancouver

VanArts: Web Development and Digital Design
